

Cristi Domsa

Senior Software Engineer

cristi.domsa@gmail.com

+40721005200

Date of birth

03/09/1985

Nationality

Romanian

Profile

Senior Software Engineer with 15 years experience leading impactful software development projects across multiple industries. Skilled in Python, FastAPI, microservices, with expertise in AWS deployment and data processing. Proven success in mentoring and coaching teams to enhance programming skills, while also contributing to business development and product design. Adept at strategic thinking and solution architecture, demonstrated in roles such as Tech Consultant and Software Development Manager. A strong background in software engineering, combined with a passion for teaching and psychology, sets me apart and drives my ability to deliver innovative, high-quality solutions.

Employment History

Administrator and freelancer at Nektum Runa, Remote

05/2017–Present

Freelancing projects in software development:

- Python REST API's (*fastAPI, flask, sqlalchemy*).
- Data science (*pandas, numpy*).
- AI (*pydanticAI, langchain, agents, RAG, open source models*).
- Stream consuming (*spark, kafka*).
- Deprecated systems migration.
- Consultancy in software development.
- Taught python classes for beginners.
- Coached teams for enhancing programming skills.

Senior Software Development Engineer at Thinslices, Remote

06/2022–07/2024

Client: Viasat US

Architecture, design and implement an automated Data Reconciliation System that remediates data drift from different sources on a PostgreSQL database of around 50 TB of data.

Other responsibilities:

- Automation of a full CI/CD cycle with github actions.
- Development of docker consumer containers.
- Configuration of AWS environment.

Tech stack: *python, FastAPI, async, asyncpg, pyRQ, Redis, GraphQL, AWS, docker.*
