Greek

PERSONAL

NATIONALITY

Romanian

DATE OF BIRTH

3 September 1985

INTERESTS

Snowboarding, hiking, music, gaming

PROFESSIONAL PROFILE

Senior Software Engineer with 15+ years of experience delivering software platforms, data systems, cloud deployments, and modernization programs across telecom, fintech, pharmaceuticals, media, gaming, and energy. Strong expertise in Python, FastAPI, microservices, PostgreSQL, AWS, Docker, Kubernetes, data pipelines, and AI-enabled applications. Experienced in solution architecture, technical leadership, CI/CD automation, mentoring, team development, product design, and client consulting.

PROFESSIONAL EXPERIENCE

- Administrator & Freelance Software Consultant | [Nektum Runa](#)

May 2017 - Present | Remote

- Deliver Python REST APIs and backend services using FastAPI, Flask, SQLAlchemy, asynchronous programming, and microservice patterns.
 - Build data-science and data-processing solutions with pandas and NumPy, including stream-processing work with Spark and Kafka.
 - Develop AI-enabled solutions using PydanticAI, LangChain, agents, retrieval-augmented generation, and open-source models.
 - Lead legacy-system migrations, software-development consulting, solution design, and technical decision-making for client projects.
 - Teach introductory Python courses and coach engineering teams to improve programming practices and delivery quality.
- Senior Software Development Engineer | [Thinslices](#)

Jan 2026 - Jul 2026 | Iasi, Romania

- Migrated legacy data-ingestion platforms to modern, maintainable data pipelines using dlt and Prefect.
- Senior Software Engineer | [Innovator Spark](#)

Oct 2025 - Apr 2026 | Cluj-Napoca, Romania

- Migrated legacy data-ingestion platforms to modern data pipelines using dlt and Prefect.
- Senior Software Development Engineer | [Thinslices - Client: Viasat US](#)

Jun 2022 - Jul 2024 | Remote

- Architected and implemented an automated Data Reconciliation System that detected and remediated data drift across multiple sources in a PostgreSQL environment of approximately 50 TB.
 - Automated the full CI/CD lifecycle with GitHub Actions, developed Docker-based consumer services, and configured AWS environments.
 - Stack: Python, FastAPI, asyncpg, PyRQ, Redis, GraphQL, AWS, Docker, PostgreSQL.
- Senior Software Engineer | [Luxoft](#)

Jan 2021 - Feb 2022 | Remote

- Deutsche Telekom: Contributed to an R&D; team implementing a cloud-based 5G network; deployed automated on-premises network systems and supported DevOps activities.
 - Viavi: Developed Python modules for a commercial network-testing product.
 - ING: Helped re-implement the internal transfers routing system; created a Mountebank-based impostor testing framework and improved deployment-pipeline security.
 - Stack: Kubernetes, Helm, OpenShift, Azure DevOps, Python, microservices.
- Python Teacher | [IT School](#)

Jul 2021 - Dec 2021 | Cluj-Napoca, Romania

- Taught beginner-level Python courses, combining programming fundamentals with practical exercises and coaching.
- Cristi Domsa | Senior Software Engineer
- 1

EDUCATION

Computer Science
Universitatea 1 Decembrie 1918
Alba Iulia
Oct 2009 - Jul 2011

Telecommunications
Polytechnic University of Timisoara
Oct 2004 - Jul 2009

CORE EXPERTISE

ARCHITECTURE

Microservices, REST APIs, distributed systems, solution design

CLOUD & DEVOPS

AWS, Docker, Kubernetes, CI/CD, Helm, OpenShift

DATA ENGINEERING

PostgreSQL, data pipelines, dlt, Prefect, Spark, Kafka

AI & ANALYTICS

Machine learning, data science, RAG, agents, open-source models

LEADERSHIP

Technical strategy, mentoring, teaching, team development, consulting

INDUSTRIES

Telecom, fintech, pharma, media, gaming, energy

ADDITIONAL TOOLS

Erlang, Ruby on Rails, Celery, RabbitMQ, pandas, NumPy, TensorFlow, R, GitHub Actions, Azure DevOps, graph databases, web crawling, automation, open-source technology.

PROFESSIONAL EXPERIENCE - CONTINUED

Software Development Manager | Cresmart

Feb 2020 - Jun 2020 | Remote

- Managed the transition of a gaming and betting application from an external development team to internal contractors.
- Evaluated the Django and mobile codebase, implemented key features, recruited team members, transferred technical knowledge, and coached the new team.
- Made architecture decisions aligned with the product roadmap.

Software Engineer | Take Off Labs

Feb 2019 - Sep 2019 | Cluj-Napoca, Romania

- Developed third-party integrations, APIs, and data synchronization workflows for software providers and golf federations using Ruby on Rails.

Data Science Developer Lead | Inflection Point Europe

Oct 2018 - Jan 2019 | Cluj-Napoca, Romania

- Developed a machine-learning algorithm for predicting energy prices.
- Led data processing, API development, data cleansing and normalization, data gathering, web crawling, and machine-learning consulting.
- Stack: Python, pandas, machine learning, data processing.

Machine Learning Specialist | Nenos Software

Jul 2018 - Sep 2018 | Cluj-Napoca, Romania

- Completed practical training in TensorFlow, machine-learning fundamentals, neural networks, CNNs, RNNs, and ResNet architectures.

Software Development Manager / CTO | Atracore

Oct 2014 - Feb 2017 | Cluj-Napoca, Romania

- Led the complete software-delivery lifecycle for a small company serving clients in the pharmaceutical industry, from requirements and architecture through delivery.
- Grew the engineering team from 2 to 7 and guided the company from a project-based model toward an internally developed framework.
- Defined software architectures, evaluated technical options against client requirements, recruited and coached engineers, maintained quality and delivery commitments, and contributed to company strategy.

Python Developer | Sourcefabric o.p.s.

Jul 2013 - Jan 2014 | Cluj-Napoca, Romania

- Contributed to the core team developing Superdesk, an open-source framework used by independent media organizations and journalists.
- Stack: Python, Flask, SQLAlchemy, graph databases.

Erlang Developer | SoftVision

Aug 2012 - Mar 2013 | Cluj-Napoca, Romania

- Developed components for a trading platform used by major investment banks using Erlang.

Software Developer & Team Leader | Dolphin Kiss

Jan 2011 - May 2012 | Cluj-Napoca, Romania

- Led the content team developing data-parsing and data-analysis mechanisms for Nokia Siemens Networks media-gateway logs.
- Built parsers and analyzers, improved processing for analyses exceeding 200 GB of files, and prepared data for statistical and prediction modules.
- Stack: Python, Flask, SQLAlchemy, R, Celery, RabbitMQ.
